

### Discover The Details!

With its bright LED light and 3x magnifying power, the National Geographic LED Magnifying Glass is a great tool for scientific investigations. Take it on a hike and search rocks along streams and riverbeds for ancient fossils. Go out to your own backyard to identify insects by getting a closer look at their markings. Spend an afternoon studying the intricate details used to mark coins and other currency. The options are endless, so get ready to discover!

### Using The LED Light:

The LED light requires three AAA batteries to operate. To install the batteries, remove the compartment door with a screwdriver. Insert 3 AAA batteries following the polarity (+)(-) inside the fitted battery compartment. Do not force a battery into place with the polarity reversed because this can damage the item. Replace the battery door and tighten the door with a screwdriver. Now that you have installed your batteries in your LED light, you may power the unit on by pressing the light switch.

### Cleaning Instructions

To clean your magnifying glass, only use a soft, lint-free cloth like a microfiber cloth. Do not apply excess pressure to the cloth to avoid scratching the lens. To remove more stubborn dirt, moisten the cleaning cloth with an eyeglass-cleaning solution and wipe the lenses gently being careful to avoid excess pressure. Protect this device from dust and moisture. When using in high humidity conditions, let the device acclimatize for a short period of time before storing in the included drawstring bag so that residual moisture can dissipate.

### SAFETY WARNINGS

Read and follow the instructions, safety rules, and first aid information.

- Respect privacy: When using this device, respect the privacy of other people. For example, do not use them to look into people's homes.
- Choking/Suffocation hazard: Children should only use this device under adult supervision. Keep packaging materials like plastic bags and rubber bands out of the reach of children as these materials pose a choking/suffocation hazard.
- Risk of blindness: NEVER use this device to look directly at the Sun or in the direct proximity of the Sun. Doing so may result in a permanent loss of vision.
- Risk of burns/fire: When using the magnifying glass, do not allow direct sunlight to pass through it onto an object. The concentration of light rays could cause burns if held over skin or start a fire if held over objects like leaves.

- Battery guidelines: This device contains electronic components that are powered by batteries. Batteries should be kept out of children's reach. When inserting batteries, please ensure the polarity is correct. Insert the batteries according to the displayed +/- information. Never mix old and new batteries. Replace all batteries at the same time. Never mix alkaline, standard carbon-zinc and rechargeable nickel-cadmium batteries. Never short circuit the device or batteries or throw either into a fire. Leaking or damaged batteries can cause injury if they come into contact with the skin. If you need to handle such batteries, please wear suitable safety gloves. Remove batteries from the product before extended storage to prevent leaking. Do not immerse the battery compartment in water.
- Do not disassemble this device. In the event of a defect, please contact your dealer. The dealer will contact the Customer Service Department and can send the device in to be repaired if necessary.
- Do not subject the device to temperatures exceeding 60°C (140°F).

- Disposal: Keep packaging materials, like plastic bags and rubber bands, away from children as they pose a risk of suffocation. Dispose of packaging materials as legally required. Consult the local authority on the matter if necessary and recycle materials when possible.
